EDUCATION

RMIT University <i>Bachelor of Information Technology, Minor in Mobile and Web Application Development</i>	Ho Chi Minh, VN July 2022 – April 2026
--	---

WORK EXPERIENCE

Web Developer <i>HR1 Vietnam Holdings</i>	May 2024 – Aug 2024 Ho Chi Minh, VN
- Developed the front-end for the company site using Smarty, PHP and JavaScript - Collaborated with designers to bring the Figma UIs to live server - Implemented responsive web interfaces ensuring consistent cross-browser and mobile compatibility.	
Software Engineer Intern <i>NashTech Vietnam</i>	Apr 2025 – Aug 2025 Ho Chi Minh, VN
- Developed the front-end architecture of an intelligent multi-agent chatbot system using Next.js, React, and TailwindCSS, integrated with a FastAPI backend. - Collaborated with backend engineers to integrate APIs, optimize request handling, and ensure seamless front-end performance in Azure-hosted environments. - Implemented multi-agent interaction flows with OpenAI Agent SDK to route user queries, invoke AI tools, and enabling AI agents to generate context-aware answers from more than 10,000 indexed documents - Implemented a robust AI-to-human handoff workflow, reducing unintentional or misrouted escalations by an estimated 40% through queue-based routing and context preservation. - Successfully showcased the system during the 2025 Capstone Project Showcase, demonstrating AI-human collaboration and enterprise-ready UI integration.	

NOTABLE PROJECTS

Map2D – GitHub Repository <i>Java</i>	Mar 2024 – May 2024
- A Points Of Interest (POIs) mapping application developed using Java - Allows people to search for locations near them with the services they need - Can handle up to 100 million locations in a 10 million x 10 million map - Using a Quadtree as a base, the applications can efficiently and precisely return service-based queries for POIs within user-defined boundaries	
Viet Motor Parts – GitHub Repository <i>Next.js, TailwindCSS, MongoDB</i>	Oct 2024 – Jan 2025
- Developed a full-stack e-commerce platform for Vietnam's motorcycle industry using Next.js, Node.js, and MongoDB, enabling seamless part browsing, compatibility checking, and secure checkout - Implemented key customer tools such as a part compatibility checker and interest rate calculator to enhance purchasing accuracy and transparency - Integrated PayPal Sandbox API for online payment processing, ensuring transaction reliability and data security (TLS 1.3) - Collaborated in Agile sprints following a hybrid Waterfall-Scrum model, using Trello and GitHub for task tracking, version control, and sprint retrospectives	

TECHNICAL SKILLS

Languages: C++, C#, Python, Java, SQL (MySQL), JavaScript, TypeScript, HTML/CSS, PHP, Swift,...
Frameworks/Libraries: React, React Native (Expo), Next.js, Node.js, Angular, Express.js, TailwindCSS, FastAPI, Swift,...
Developer Tools: Git, Figma, Docker, MongoDB, Google Cloud Platform, VS Code, Azure, Firebase, Jira,...
